How do I download the App?

The Visitor App will only be useful to you, once you have been **approved** as an Individual AND your company has also been approved.

The name of the app is usually [Client Name] Visitor.

Go to the [Apple App Store](#) (iPhones) or [Google Play Store](#)(Android) and search for [Client Name] Visitor . The App icon will be shown.

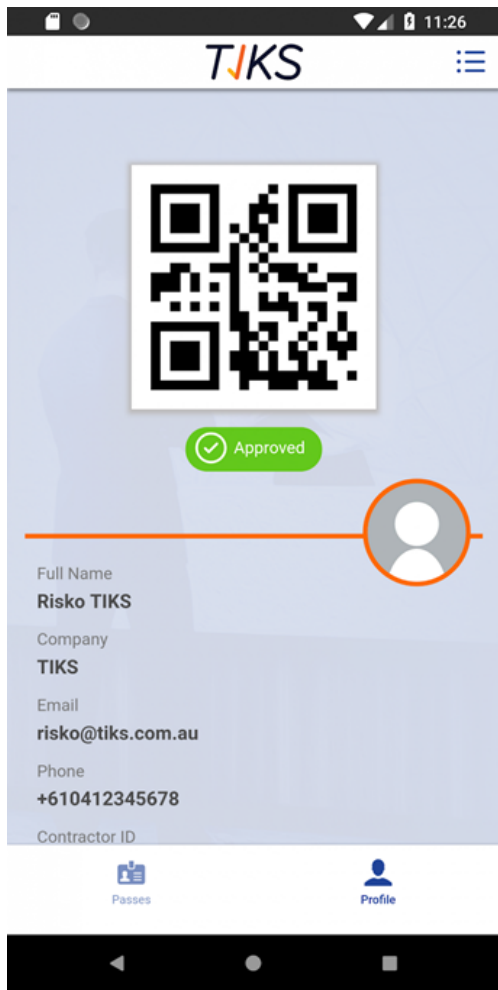

Download the App to your mobile device.

Once you have been **approved**, you will receive **an email** titled **Successful Contractor Registration**.

Please follow the instructions in the email to launch the app, by tapping on the Click Here to launch the app tile from within the email. See example email below.

Once you tap on that tile, the app will **launch and log you in**.

Your QR Code will be part of your profile. You can use it to scan into site on a kiosk or turnstile scanner.

Or you can use the App to scan a site QR code to sign into site.

Remember to scan out of site when you are finished work on site.
