

How do I add Content to a Zone?

To add start adding content to a zone (known as playlist items), either Double Click the zone or click the 'Edit Zone Playlist' button:

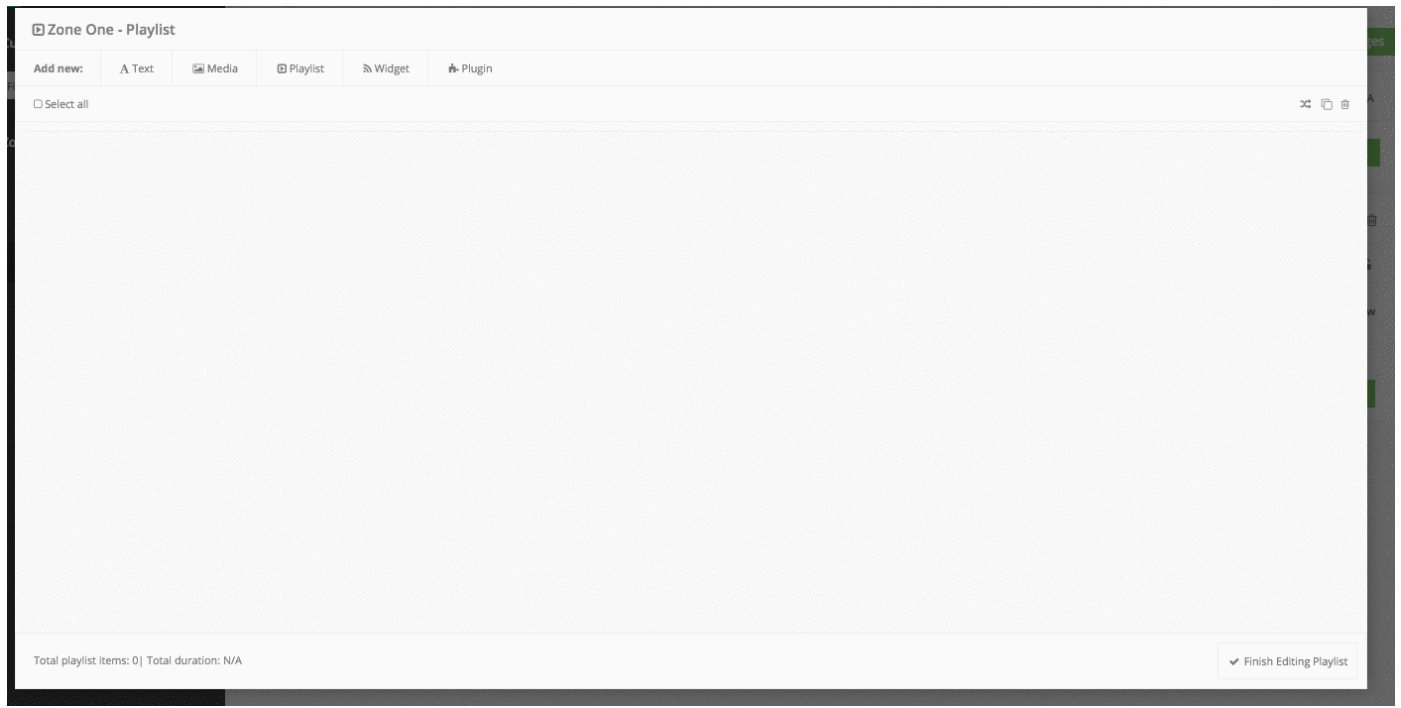

Now you can select from the available content types to begin building your playlist:

Note: If you only have one playlist item in the zone, then this will play on repeat. If you have more than one item, the timings for each item will be used (along with other conditional play rules) to determine how long and when each item will play.

Text

This will insert a text content item to the playlist. You can then customise the text and formatting by clicking the blue 'Edit Text and Formatting' option:

Media

When you click to add media, a new panel will open with the ability Browse your media library, select an item and insert this into the zone.

Widgets

Browse the selection of widgets available. Each widget will have it's own set of configurable settings that may be required to be set before the widget will display in the zone.

Plugins

If a Plugin has been added to your account, it can be inserted into a zone here. A range of plugins are available offering extended functionality. Each plugin will have its own set of configurable settings.
