

Overview: Layouts

A Layout is a content you want to be displayed on your device(s). Use the WYSIWYG layout builder to create your content, using pages, zones and playlist items. You can create an unlimited number of layouts that can be scheduled to show on your device(s).

If you are a new user, you will notice that you have a demo layout already created in your 'Layouts' section. Continue reading this article if you wish to create a new layout from scratch or click the link below to be taken to the layout builder article, to find out how to edit your demo layout.

Create a Layout

Navigate to the 'Layouts' section of your account and click 'Add New' to configure your layout. The settings to configure are:

- **Name** - Give your layout a name for your reference.
- **Resolutions** - Choose the resolution(s) of your layout - Resolutions are added automatically when you register a device or you can add custom resolutions by clicking 'Add Resolution'.
- **Orientations** - Choose the orientation(s) of your layout.
- **Template** - Choose a template to start your layout from - Your layouts can be saved as templates if you haven't got any templates or want to start your layout from scratch choose the 'Blank' option.

(Layouts can support multiple resolutions and orientations, you then choose which you are designing for in the layout builder, click [here](#) to find out more)

The screenshot displays the layout configuration interface, divided into two main sections: 'Settings' and 'Template'.

Settings Section:

- Layout Name:** A text input field containing 'Layout Example'.
- Resolutions:** A row of checkboxes for '1920 x 1080' (checked), '2732 x 2048', '1331 x 749', and '1334 x 750', followed by a '+ Add Resolution' button.
- Orientations:** A row of checkboxes for 'Landscape' (checked) and 'Portrait'.

Template Section:

- A row of checkboxes for 'Template Example' and 'Blank' (checked).
