Microsoft Graph API

1. Find your **tenantId** https://docs.microsoft.com/en-us/onedrive/find-your-office-365-tenant-id
2. Enable graph API and add an APP to allow VMS to connect to their Graph API

   https://developer.microsoft.com/en-us/graph/quick-start
3. Add the appropriate permissions allowing the TIKS VMS to retrieve list of users

Application	User.Read.All, User.ReadWrite.All, Directory.Read.All, Directory.ReadWrite.All

4. Generate a Client Secret, and you should have the client_id and the client_secret

```
$post_params = array(
    "client_id" => $clientId,    "scope" =>
"https%3A%2F%2Fgraph.microsoft.com%2F.default",
    "client_secret" => $clientSecret,
    "grant_type" => "client_credentials",);
```

Please provide your TIKS account manager

1. Tenant ID
2. Client ID
3. Client Secret
